PEDESTAL LINERS

Kryptane® Polyurethane Pedestal Liners by Argonics
12 yard RexCon Mixer Blade

The lower front and trailing edges of all pedestals are subject to extreme metal fatigue and wear. Argonics Pedestal Liners protect these critical wear points of mixer blade pedestals with our exclusive high wear resistant Kryptane® polyurethane.

Kryptane® polyurethane's surface also helps to eliminate cement build up from occurring around the pedestals base, keeping your mixer easier to maintain with less down time needed for cleaning.

Installation of Pedestal Liners is quick and easy... Simply bolt into place.
