For Immediate Release

Argonics Announces the Acquisition of Kryptane Systems

Argonics, Inc. announces the acquisition of Kryptane Systems, LLC of Louisville, Colo. For more than 30 years, Kryptane Systems has been a leader in the production of precision cast polyurethane products such as precision rollers, casters, springs, and agricultural, medical and recreational products.

“This purchase will allow Argonics a complete prototyping and hand casting facility to produce ‘one off’ prototypes and proof of concept parts to current and potential customers as well as a precision parts division,” says Bob Airaudi, Vice-President of Sales and Marketing for Argonics. “We’ll now be able to offer our customers low volume and hand cast production parts as well as concept development, mold design, and product implementation with quick turn around.”

Kryptane Systems is currently housed in a 20,000 sq. ft. facility with a complete machine shop, tooling and mold department with three precision pouring machines.

Argonics, Inc. was founded in 1994 and is the leader in performance polyurethanes. Based in Marquette, Mich., it is the industry’s largest producer of polyurethane products. For more information contact Argonics at 800.991.2746, email information@argonics.com or visit online at www.argonics.com.
