Say Goodbye to Carryback...

Say hello to lower maintenance cost with Argonics' Secondary Belt Cleaning System

GWINN, Mich. – July 14, 2010 – Argonics Inc. announces immediate availability of its new Secondary Belt Cleaning System, the Eraser DS. Argonics, a leading provider of conveyor belt cleaning systems for the mining, concrete and aggregate industries, has engineered the Eraser DS Secondary Cleaning System to deliver superior cleaning performance at a value that helps reduce overall maintenance expense.

Installed at the point where the belt leaves the head pulley, and specifically designed for reversing conveyor belt applications, Argonics' Eraser DS secondary system is a vital part of the conveyor system. Argonics' secondary system cleans the conveyor to prevent carryback from becoming a nuisance or safety hazard.

This new high-performance Eraser DS extends conveyor belt life, and lowers maintenance costs and potential for downtime. Argonics' Eraser DS Secondary Belt Cleaner effectively eliminates common conveyor carryback problems such as conveyor belt misalignment, accumulation of material and/or material build up. The cleaner is easy to install and allows for fast, efficient blade change out, thereby reducing downtime.

Argonics' Eraser DS, cont.

“The Eraser DS Secondary Belt Cleaning system is designed to be an economical version of our heavy duty XTC cleaner, with a .19" (5 mm) thick, 2" × 2" (50 mm × 50 mm) powder-coated tube stock steel mainframe for strength and durability,” says Bob Welker, Sales and Marketing Manager. The system is manufactured with blades available in polyurethane and tungsten carbide. The new system uses a single pin blade attachment, making blade change out quick, reducing conveyor downtime and eliminating the potential for rusty bolts.

The Eraser DS Secondary Belt Cleaning System is available now through the Argonics distribution network.

Founded in 1994, Argonics Inc. is one of the industry's largest producers of polyurethane products. With state-of-the-art production facilities in Gwinn, Mich. and Louisville, Colo., Argonics provides high-performance urethane solutions with its team of qualified personnel. For more information call 906.226.9747 or 800.991.2746 or visit the company's website at www.argonics.com.
