

# VALVE BOX COVER WATERWORKS POLYURETHANE PRODUCTS

Argonics' polyurethane valve box covers won't bond to the cast box and provide a tight seal for the perfect fit. They keep out most contaminants, prevent valve box wear and reduce rattling noise 100%. They are tight enough so they won't pop or roll out, yet pliable enough so they don't need to be thawed to be removed during winter weather.

## BENEFITS

- **AASHTO H-25 LOAD RATED**
- Works in partially broken boxes
- Tremendous noise reduction
- Will not freeze, unlike its cast iron counterparts
- Fits most standard cast iron valve boxes
- Easily removed with pry bar or flat screw driver

All Argonics products are  
proudly made in the USA.

Argonics' valve box cover is protected by the  
following patent: 8,375,551.

*"We've noticed a definite improvement in ride performance. When you drive over them, you don't even notice that they're there. From the beginning there was absolutely zero rattling noise of the top of the casting from traffic. In recent reconstruction projects, the old style caps get pulled out of the casting by traffic. We also get constant complaints of noisy tops which require many man hours to correct. With your products, there have been no such problems to date."*
