## SNOW REMOVAL POLYURETHANE PRODUCTS

Tundra Tamer™ products are made with Argonics polyurethane, which is regarded by the mining, concrete and agricultural industries as one of the most wear-resistant polyurethane available.

All Argonics products are proudly made in the USA.

## CURB SAVER BLOCK

Our long-lasting polyurethane blocks retrofit your plow trucks' steel or tungsten curb runners. When tested in an area with high snowfall in the northern Upper Peninsula of Michigan, the curb saver blocks are lasting 1-2 seasons.

Note: Maximum speed of 35 mph

### BENEFITS

- ✦ Eliminates chipping and breaking of concrete curbing
- ✦ Protects plow from damage and increased maintenance
- ✦ Less shock and vibration on the plow truck and operator
- ✦ Reversible block offers two wear surfaces
- ✦ Attachment is standard bolt pattern

## SNOW PLOW CUTTING EDGES

The polyurethane blade will absorb the shock produced by impact and will not crack the cast iron and concrete structures. Protect your manhole covers, valve boxes, curbs, markings, reflectors and cobblestones.

Note: Maximum speed of 35 mph

### BENEFITS

- ✦ Designed to withstand the harshest winters
- ✦ Polyurethane outlasts rubber 3-5 times, reducing truck downtime
- ✦ Reversible blade doubles the wear life
- ✦ Noise reduction for both residential areas and the driver
- ✦ Absorbs shock, creating less wear and tear on vehicle and less driver fatigue

## SALT & SAND SPINNERS

Our corrosion-resistant polyurethane salt and sand spinners have a higher abrasion resistance than steel. Because of their light-weight, low-maintenance design, they require less horsepower to turn.

### BENEFITS

- ✦ Resistant to the corrosive action of salt and sand
- ✦ Flexible - spinners do not bend or break when hit
- ✦ Universal design fits most truck equipment on the market
- ✦ Two designs available with straight or curved fins
- ✦ Steel inserts available on select sizes

## SNOW BLOWER ROTOR PADDLES

Argonics polyurethane snow blower rotor paddles last four times longer than OEM rubber paddles. The paddles are designed with wear indicator nubs to help you visually see when it's time to order more.

### BENEFITS

- ✦ 3/8" thick, one of the thickest available
- ✦ Last 4 or more times longer than OEM rubber rotors
- ✦ Fit more than 80 different models of snow blowers and throwers
- ✦ Wear indicator nubs help you visually see when it's time to replace
- ✦ Attachment is standard bolt pattern
