

Containment Liners

PLAIN AND CERAMIC EMBEDDED

Designed to do one thing and do it well: contain material at the transfer points on your belt line. The extra-rugged reinforced design with $\frac{3}{16}$ " steel means that our Containment Liners are extremely effective in reducing spillage, resulting in reduced clean-up labor.

Now available with single or double bevel. Double bevel essentially doubles the wear life of the liner. When one side is worn, just flip it over!

All Containment Liners come with Snap-Tite™ polyurethane plugs that cover the mounting slots and prevent material build-up.

FEATURES AND BENEFITS:

- Excellent for containing material at the transfer points on your belt line
- Extra-rugged, reinforced design with $\frac{3}{16}$ " steel
- Extremely effective in reducing spillage

AVAILABLE SIZES:

Plain liners:

Lengths: 24", 36", 48", 60", 72", 96"

Heights: 6", 8", 10", 12"

Thicknesses: 1", 2"

Edges: flat, 20°, 35°, 45° bevel

Ceramic liners:

Lengths: 48", 60"

Heights: 8", 10", 12"

Thicknesses: 1", 2"

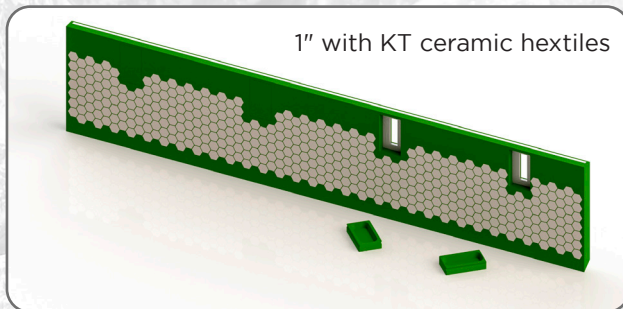

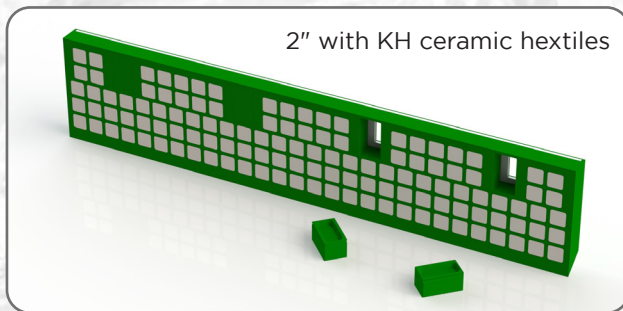

Edges: flat, 20°, 35° bevel

Ceramic Containment Liners

Our Containment Liners are also available with embedded ceramics.

Ceramic Containment Liners that are 1" thick contains ceramic hextiles, while the 2" liners contain ceramic cubes.

All Containment Liners come with Snap-Tite polyurethane plugs that cover the mounting slots and prevent material build-up.
