

OTR Sidewall Protector

ARGONICS
ENGINEERED POLYURETHANE

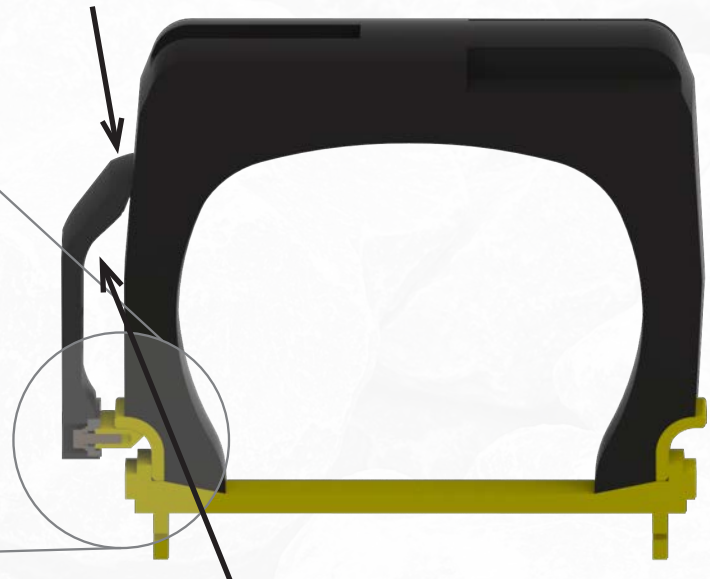

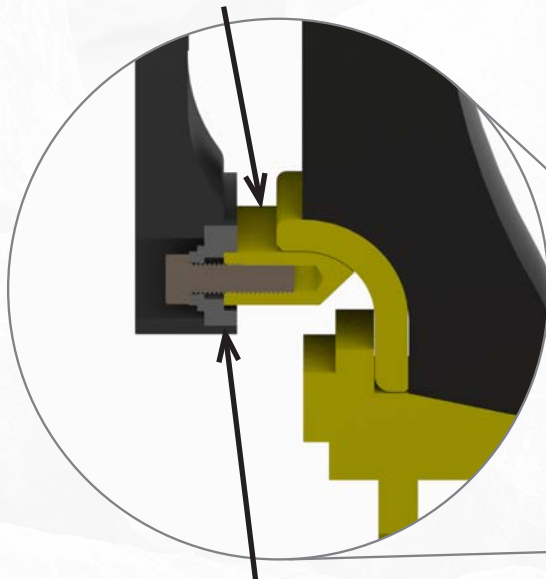

Patented, multi-panel design

Engineered to perform

Specially designed mounting flange

Profiled panel tip maintains contact with the tire

4-bolt attachment and patent-pending solid metal insert ensures a secure fit

Engineered cavity allows for tire bulging when under load

Replace panels, not tires

SACRIFICIAL INSURANCE FOR YOUR EXPENSIVE TIRES

The OTR Sidewall Protector system is designed to be a sacrificial part that will take the abuse, saving your expensive OTR tires. An investment of hundreds of dollars can save you thousands in tire replacement.

MADE FROM DURABLE KRYPTANE® POLYURETHANE

Each protector panel is manufactured with Argonics' most cut and tear resistant formulation. It is ideally suited for the harsh environments in which the panels are used. The material also has the ability to change shape under heavy load pressure, then return to its original shape once the load is removed.

AN INSURANCE POLICY AGAINST COSTLY ACCIDENTS

It happens. An operator doesn't notice a large rock or comes too close to a wall or outcropping, and the tire becomes damaged. With the OTR Sidewall Protector's modular design, you only replace the damaged panel, not the tire, which saves both time and money.

Sizes currently available

- 29.5R25
- 35/65R33
- 45/65R45
- 875/65R29
