

# Magnetic Wear Panels

## MODULAR LINING SYSTEM

Our magnetic modular panels can be quickly and easily installed into any pattern to help reduce wear in critical areas of your operation.

### SIZES AVAILABLE:

- Solid polyurethane panels available in thicknesses of 1/2", 1", 1 1/2" and 2"
- Panel sizes: 6"x6", 6"x12", 12"x12" and 12"x24"

### PERFECT FOR THESE APPLICATIONS:

- Conveyor transfer points
- Screen feed liners
- Chutes with high wear
- Charge chutes
- Screen discharge liners

### MAGNETIC PANEL FEATURES:

- Strong rare earth magnets hold the panels in place. No welding, gluing or bolting necessary!
- Panels can be placed together to easily address wear areas of any size
- Our 1/2" thick patches are perfect for covering holes in walls or chutes
- Kryptane® polyurethane outlasts rubber and steel AR plate
- Available in a wide variety of formulations
- Custom sizes available upon request

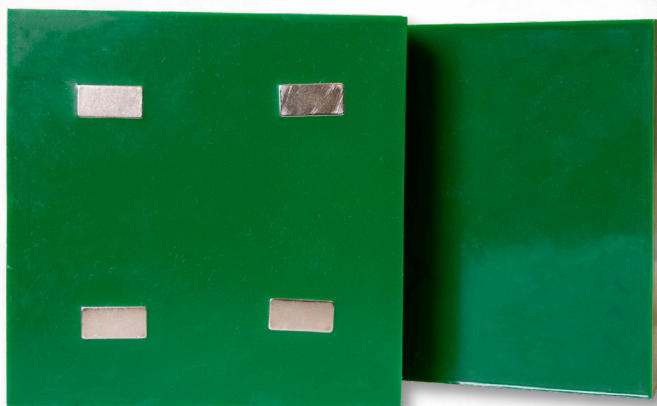

# Our magnetic liners hold tight

## PRACTICAL

Our magnetic modular panels are easy to install and require no maintenance. Our proven Kryptane® polyurethane will outlast most any other wear product available today and provide protection for your harshest hot spots in transfer points, bins and hoppers.

## THE EASY CHOICE

Magnetic liners are available in a variety of durometers and formulas that are designed for a number of different applications. Strong rare earth magnets hold the panels in place, allowing for quick and easy install. If one panel wears out, just replace the worn section. Nothing beats the wear-resistant properties of Kryptane®, the most durable polyurethane in the industry.

### Sizes Available:

Sizes: 6"x6", 6"x12", 12"x12", 12"x24

Thicknesses: 1/2", 1", 1 1/2", 2"
