

ERASER MDP CONVEYOR BELT CLEANER

The Premier Solution for Mining Applications

The Eraser MDP conveyor belt cleaner is a tough and rugged cleaner engineered for the harshest mining applications. Our patent-pending **new blade insert provides strength and toughness**, allowing the 12" tall Kryptane® polyurethane blade to effectively remove carryback material.

Designed to withstand the most demanding environments, this mine duty cleaning system combines strength, durability, and superior cleaning performance to keep your conveyors running efficiently.

Why Choose the Eraser MDP?

UNIQUE DESIGN FEATURES

Robust Polyurethane Blade:

Equipped with a 12" polyurethane blade, the Eraser MDP provides highly effective cleaning performance for demanding conveyor applications. The patent-pending blade insert is engineered for exceptional strength and toughness, ensuring peak performance and extended service life.

Durable Construction:

The backbone of this system is our Super Eraser's .25" thick, 3.5" x 3.5" tube stock steel mainframe, combined with galvanized Schedule 160 pipe stub ends that resist corrosion in harsh environments.

Minimize Downtime:

Swap out blades quickly and efficiently with the single pin blade attachment system, reducing maintenance time and keeping your operation productive.

BENEFITS AND HIGHLIGHTS

Consistent Cleaning Pressure:

Featuring the Perma-Torque™ adjustable internal central tensioner, operators can easily fine-tune tension from 30 to 100 ft-lb for uniform cleaning pressure across the conveyor.

Enhanced Safety and Durability:

Safety yellow end caps not only ensure visibility but also protect the Safe Torque™ ratchet mechanism from dust and water contamination, extending its lifespan.

Compact and Low-Profile Mounting:

A space-saving design ensures that the system protrudes only 5.5" from the mounting structure, meaning it can fit seamlessly into even the most constrained spaces.

Sizing:

Accommodates belt widths from 30" to 72" (762 to 2438 mm).
