

Asphalt Compactor Blades

CLEAN YOUR VIBRATORY ROLLER COMPACTION DRUMS WITH KRYPTANE® POLYURETHANE

Argonics' Kryptane polyurethane has superior abrasion resistance and washes down better than steel or rubber.

Our polyurethane scrapers are designed to efficiently clean asphalt and aggregate from vibratory-roller compaction drums. By preventing dried debris, they ensure smooth soil and aggregate bases, which are essential for construction projects.

These flexible scrapers maintain clean drum surfaces, enhancing compaction quality and preventing aggregate or asphalt from sticking to the drum. Engineered for wear resistance, they offer durable performance at low operating costs, delivering reliable results for the best paving and surface quality.

FEATURES AND BENEFITS:

- Replacement blades for a variety of manufacturers
- Prevent material from drying onto the drum to ensure a smooth base essential for the best paving and surface quality
- Efficiently clean wet sandy soil, dusty clay, compacted rock dust, or asphalt from sticking to the drum

REPLACEMENT BLADES FOR THE FOLLOWING MANUFACTURERS:

- BOMAG
- Caterpillar
- John Deere
- SAKAI
- Volvo
- Blank blades also available
