

MagnaPlug

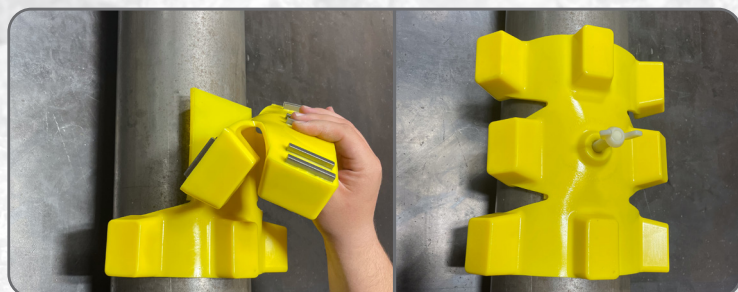

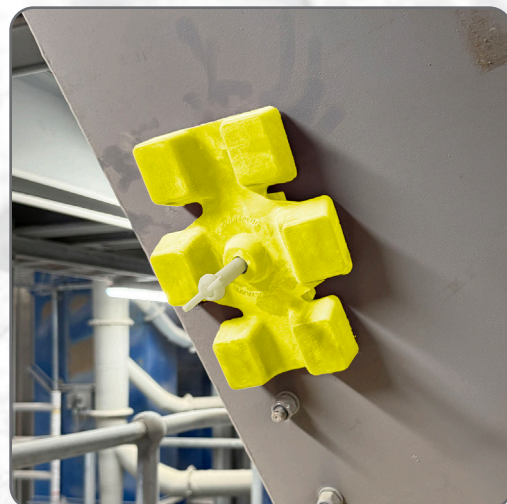

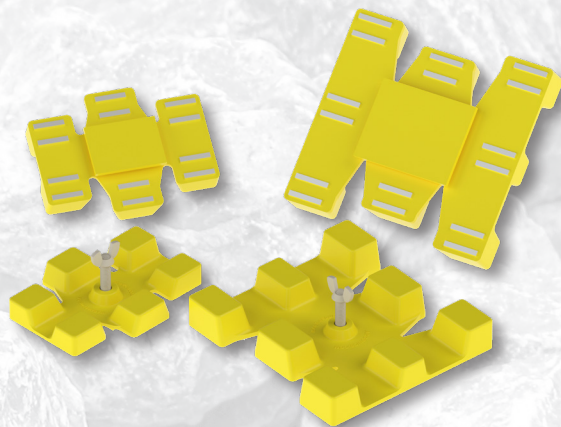

ARGONICS
ENGINEERED POLYURETHANE

MagnaPlug offers a fast and effective way to address leaks until a permanent repair is made, reducing clean up and down time.

The MagnaPlug is a quick and secure method of repairing holes in steel pipes, elbows, bins, hoppers, and other steel equipment subjected to abrasion.

Ideal for use on flat, curved, or corner applications.

FEATURES AND BENEFITS:

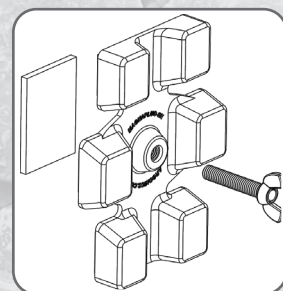

- **Easy to install** – polyurethane wear pad is placed over the hole, followed by the MagnaPlug, which is secured further using the Power Screw
- **Reusable** – replacement wear pads are available for future use after repairs are made
- **No tools needed!** Strong magnets hold the panels firmly in place, even on vibrating or heavy impact applications. Just snap it on!

SIZES AVAILABLE:

- **SE** – for 6" & up diameter pipes
- **LE** – for 9" & up diameter pipes

THREE-PIECE KIT:

- MagnaPlug
- Polyurethane wear pad
- Power Screw
